PROFESSIONAL SUMMARY

UI/UX Engineer and Software Engineering graduate with experience designing and developing healthcare, financial, property and corporate digital products. Skilled in translating requirements into user flows, wireframes, interactive prototypes, responsive interfaces and reusable design systems. Combines user-centred design with frontend development knowledge to create accessible, practical and developer-ready experiences.

CORE SKILLS

UX & Product Design: User research, requirements analysis, information architecture, user flows, wireframing, interactive prototyping, high-fidelity UI design and usability testing

Design Delivery: Responsive web and mobile design, design systems, WCAG accessibility, design QA and developer handoff

Design Tools: Figma, Adobe XD, Miro

Frontend: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS and Bootstrap

Technical & Collaboration: Git, GitHub, Agile/Scrum, cross-functional collaboration, Node.js, SQL, PostgreSQL, MySQL, Supabase and Prisma ORM

PROFESSIONAL EXPERIENCE

Associate Software Engineer | Medi Connect Pvt Ltd

Colombo, Sri Lanka | July 2026 - Present

- Design and refine responsive healthcare workflows and interface patterns, aligning usability with implementation requirements.
- Collaborate with software and design teams to validate functionality, test user flows and resolve interface issues.
- Designed end-to-end user and administrator experiences for the Beverly Hills Hiriketiya Villa management platform, including project-plan and villa-slot workflows.
- Designed UI/UX for the MediGo healthcare web application and the Nexvia Ventures corporate website, focusing on clear navigation, consistent branding and responsive behaviour.

Associate UI/UX Developer | Tech Connect Global (Pvt) Ltd

Colombo, Sri Lanka | January 2026 - June 2026

- Designed and developed the Tech Connect Global and Medi Connect official websites using React-based stacks, TypeScript, Tailwind CSS and reusable component patterns.
- Translated approved Figma designs into responsive UI components and maintained consistent layouts across desktop, tablet and mobile breakpoints.
- Designed end-to-end UI/UX for a personal expense management mobile application across user and administrator interfaces, including dashboards, expenses, transactions, reports and profiles.
- Conducted responsive and usability checks to maintain consistent behaviour across web and mobile experiences.

UI/UX Designer Intern | Tech Connect Global (Pvt) Ltd

Colombo, Sri Lanka | July 2025 - December 2025

- Created user flows, wireframes, interactive prototypes and high-fidelity Figma interfaces for healthcare and personal-finance systems.
- Designed patient, laboratory, pharmacy, billing and dashboard modules for electronic medical record and hospital information system workflows.
- Collaborated with designers and developers through usability reviews, feedback sessions and structured developer handoff.
- Applied responsive and accessible design principles across desktop and tablet interfaces.

SELECTED PROJECTS

MediGo - Healthcare Web Application

Focus: Product design, healthcare workflows, responsive web UI

- Designed patient-focused flows for symptom input, doctor discovery, appointment booking, payment, QR ticketing, notifications and support.
- Applied consistent UI patterns and accessibility considerations across patient-facing screens and responsive layouts.

Beverly Hills Hiriketiya Villa Management Platform

Focus: End-to-end UI/UX, user and administrator workflows

- Created user and administrator experiences for project-plan browsing, villa-slot management, availability states and user-role management.
- Produced responsive, handoff-ready interfaces with clear hierarchy and consistent component behaviour.

Personal Expense Management Mobile Application

Focus: Mobile product design for Android and iOS

- Designed user and administrator interfaces for dashboards, expense tracking, transactions, reports, profiles and management screens.
- Mapped workflows from user flows and wireframes through interactive prototypes and high-fidelity Figma screens.

KAVON.net - Full-Stack E-commerce Platform

Focus: Responsive product design and frontend/full-stack development

- Designed and developed a customer storefront, protected administrator dashboard and product, customer and order workflows.
- Implemented account verification, authenticated checkout and API-side validation for stock, pricing, discounts, shipping and final totals.

Smart Web POS System

Focus: Product workflows, responsive UI and full-stack development

- Designed and developed modular workflows for billing, products, inventory, customers, suppliers and sales reporting.
- Created role-based access, stock-monitoring, activity-logging and data-export experiences using a modern React and PostgreSQL stack.

Fully Automated Event Management System - Final-Year University Project

Focus: Responsive web development, role-based workflows and database integration

- Developed a responsive platform for venue booking, task assignment and participant management.
- Implemented role-based access for administrators, band owners and event managers with MySQL-backed workflows.

EDUCATION

BSc (Hons) in Software Engineering

University of Plymouth, United Kingdom | Delivered at NSBM Green University, Homagama, Sri Lanka

Graduated: December 2025

LANGUAGES

Sinhala - Native | English - Professional Proficiency
